

XPE0810

XPE0810

Jaw Crusher

Application: Used in the primary pre-crushing stage.

Suitable for: medium and high hardness sand and gravel aggregates, recycled aggregates and mining applications.

XCMG ROAD MACHINERY BUSINESS UNIT

Technical Features

- Using well-known brand engine, it has strong power, high efficiency and low energy consumption;
- Equipped with a deep V-cavity crushing unit, the crushing capacity is stronger;
- The discharge port is hydraulically adjusted, and the operation is simple and convenient;
- Equipped with pre-screening machine, it effectively reduces energy consumption and increases production capacity;
- The intelligent continuous feeding system automatically adjusts the feeding speed according to the material level, load and other information, making the production more continuous;
- Wireless remote control, one-button start and stop, intelligent fault diagnosis, real-time monitoring and storage of running status, more convenient for users to operate and maintain;
- Low-pressure spray dust removal, vibrating parts efficiently reduce vibration and noise, the whole machine is more environmentally friendly.
- Equipped with magnetic separator to effectively separate metal products;
- Folding hoppers and conveyors facilitate simple transportation and fast set-up;

Technical Specifications

Item	Specification
Product Model	XPE0810
Feed size, maximum	560mm
Crusher inlet size (width × length)	1060×700mm
Crushing capacity	140~300 t/h
Machine weight	45t
Engine power	265kW

Main Dimensions (Unit: mm)
